

**Safety and Risk Management  
Senior Consultants**

**Competitive salary package**

**Join a growing and exciting business**

**Opportunity to use your extensive skills and for professional growth**

**Ibis Business Solutions** is a successful and growing consulting firm providing high quality risk management service and support to business. With a reputation for delivering value add service our rapidly growing client base comprises blue chip companies in the mining, oil and gas, chemical, engineering and construction, manufacturing, and utilities industries. Our services include systems development and support; organisational, cultural and behavioural change; training and development; audit and risk assessment. Our work involves all areas of risk including health and safety, environment and general operational risk. We are passionate about delivering results to our clients and to creating a dynamic, challenging and innovative work environment for our people.

**The Role:**

Continued growth in the business has created opportunities for experienced risk management consultants to join our team. As part of the consulting team you will have be responsible for conceptualising and scoping assignments with prospective clients, managing assignments and delivering services. You will have strong skills in more than one of the following areas:

**Consulting** – facilitating change through development of strong relationships with client teams;

**Auditing** – conducting high quality audits against a range of criteria with a consultative approach;

**Training and development** – designing and facilitating high quality adult learning to a range of organisational levels from supervisor to senior management;

**Risk assessment** – facilitating risk assessments using tools such as what if, HAZOP, FMEA, Fault tree and Event tree and Layer of Protection analysis;

**Problem solving** – diagnosing issues and presenting and implementing flexible, targeted, practical and effective solutions.

You will have a thorough and practical understanding of risk management and the ability to apply that to the real world of our clients. Your sound knowledge of business and its operation will bring practicality and wisdom to your advice. You will have a natural ability to form and maintain relationships with clients and team members. You will have a majority of the following skills and competencies:

- Excellent verbal and written communication skills;
- First class facilitation skills;
- Tertiary qualifications in engineering or risk management.
- Operational experience in heavy industry gained through at least 5 years;

This is a challenging and stimulating role which covers a broad spectrum of industry environments and risk and provides you with the ideal environment to express and grow your talents and capability. If selected, you will become an integral part of our team with scope to develop your skills at a professional and personal level.

**Your Rewards:**

An attractive package including incentive bonuses will be negotiated according to your experience and capacity. A professional development program will be designed specifically to help grow your skill set and experience base.

Applications demonstrating your capabilities against the above criteria should be forwarded to Ibis via email to [recruitment@ibis-solutions.com.au](mailto:recruitment@ibis-solutions.com.au). For more information call Mark Lapworth on (03) 9005 4615.
